and production

Strategic Partner

### Readily available, from stock

With Zuidberg, you are assured of prompt delivery. Thanks to our efficient production and inventory management, we can deliver most sizes from stock, so you won't have to wait long for new rubber tracks for your tractor.

### Ultra modern production in-house

Our rubber tracks are produced through an ultra modern and highly automated manufacturing process, resulting in a balanced carcass and consistent quality. This ensures not only that each product meets our strict quality standards, but also that you can count on reliability in every delivery.

## High quality - Dutch craftsmanship

Each Zuidberg rubber track is the result of high-quality Dutch craftsmanship. Our products are manufactured in the EU, allowing us to guarantee the highest quality standards and provide customers worldwide with reliable and durable tracks.

## 'Heavy Duty' main cables for maximum lifespan

Zuidberg uses standard 'heavy duty' main cables incorporated into the rubber track. These are designed for the toughest conditions. These robust cables guarantee a long lifespan, even under intensive use on rough terrain, and reduce maintenance and long-term costs.

## Optimized drive lugs for heavy loads

The optimized drive lugs of our rubber tracks are specially designed for heavy-duty use. This ensures that the tracks maintain excellent performance when moving heavy loads and extends track life even in the most demanding working conditions.

## High performance and exceptional heat resistance

Our rubber tracks are manufactured from high performance compounds that offer excellent resistance to heat build-up. This means your tracks will continue to perform optimally, even in extreme working conditions. Zuidberg tracks are proven to withstand high temperature.

## Flexible carcass with steel reinforcement

The flexible carcass of our rubber tracks is equipped with high-quality steel reinforcement. This combination provides exceptional tensile strength, durability and flexibility. This makes the tracks ideal for heavy-duty work and complex terrain, where your tractor needs maximum stability and grip.

## Maximum corrosion protection

Zuidberg's innovative manufacturing technology provides optimal corrosion protection for the main cables and steel reinforcement of the tracks. Advanced technologies allow us to protect tracks from corrosion even in the most extreme environments. This means less wear and tear and lower maintenance costs, giving you a better return on your investment.

## Our name as a guarantee

Zuidberg rubber tracks offer unmatched quality and reliability, with the signature subtly branded into each rubber mat as a guarantee of robustness, durability and optimum performance, even under the harshest conditions!

## Wide range and special dimensions on request

Whether you need a standard size or a special dimension, Zuidberg offers a wide range of lengths, widths and profile sizes. Do you have specific requirements? We also provide customized solutions upon request, so you can equip your machine with the desired rubber track.

Available sizes for the Case IH Quadtrac:

Belt			Treadbar				Carcass		
Part number	Length (mm)	Width (mm)	Outside treadbar (#)	Height of treadbar (mm)	Pitch (mm)	Drive lugs (#)	Plies (#)	Main cable size (mm)	Thickness (mm)
90031020	6350	762	84	51	152	42	3	5,2	32
90031030	6350	914	84	51	152	42	3	5,2	32

## Choose quality. Choose Zuidberg.

Zuidberg rubber tracks are the reliable choice for any heavy-duty machine. With top-quality materials, advanced technology and unmatched performance, you can rely on Zuidberg for a long-lasting and cost-effective solution.
